Continued Examination Under 37 CFR. 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued under 37 CFR 1.114, and fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 02/27/08 has been entered.

Allowable subject matter

Claims 1, 3-18 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art neither discloses nor suggests the following limitations, in combination with the remaining elements as disclosed in claims 1, 15, 16, 17, 18.

"The specific code character comprising an identifier field having information to represent an identifier which is reserved for private use and that is not any character specified in character set standards, a character field having information to represent the illegal character, and a position field having information to represent the position of the illegal character in the filename".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Proper motivation has not been found in any reference for combining teachings to disclose the claimed invention.

Drawings

Drawings filed on 01/26/04 are objected because they are informal. Formal drawings are required for publication.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The closest reference, Hejlsberg et al. (USP 7,165,239) discloses encoding the specified binary bytes, replacing pubid and sysid, decoding XML names, and that indexers, private fields and read-only properties are not serialized. And Perrin et al. (US 2004/0088153) discloses replacing the illegal character with a specific code character having information coded about the illegal character.

The above cited references do not disclose the claimed invention.
